## About Independents Fiber Network

Independents Fiber Network is a wholly owned subsidiary of CNI that was established in 2003 to better serve the voice, video and data services of its customers.

We are an Ohio-based company that brings high-performance, high-capacity, Ethernet-over-fiber solutions to your doorstep.

By operating a fiber-optic backhaul network dedicated to serving rural and underserved communities in Ohio, Michigan and Indiana, we're able to deliver connectivity you can count on for mission-critical operations, ensuring business continuity and access when you need them most.

### WAN Transport

All your business locations around the world connected by one single point of contact over facility-based fiber rings

### Facilities & Infrastructure

Carrier-class PoP with peace of mind backed by our NOC and customer care center that offers a four-hour or better mean time to repair

### IPPBX Voice Services

Voice support services that keep your business operations running smoothly

### DWDM Services

Higher capacity at lower costs, all on a private, dedicated wide-area transport network

### Dedicated Internet Access (DIA)

Scalable bandwidth that meets your unique network needs

### Cloud Connectivity

Through our partnership with Megaport, you now have access to a global ecosystem of leading service providers through a single connection
