

GigE+ Fiber Optic Network

Delivered by Independents Fiber Network

When Success Counts. Performance Matters.

Reliability. Experience. Teamwork.
All from a single point of contact.

In order to be the best at what you do and reach your goals in this fast-paced world, you need top-notch technology you can count on. That's why our interconnected communication technology partners are working together to deliver the most reliable data connectivity through a fiber optic network for organizations in Western Ohio and across the nation.

Our GigE+ Fiber Optic Network delivers connectivity you can count on for mission critical operations—ensuring business continuity and access to important data when you need it. Additionally, you can rely on our Network Operations Center (NOC) to continually monitor your network for 'round-the-clock' availability.

We believe our customers should have choices. So as an Independents Fiber Network customer, you can choose from the GigE+ best-in-class service providers for security, voice, HD video and/or data service - ensuring you get the most for your technology budget.

Reliability.

Network redundancy means connectivity you can rely on.

Choice.

GigE+ interconnects with over 35 expert communication providers—giving you choice, control and cost efficiency in meeting all your communication needs.

Focus + Access.

Providing custom connections where you need them in Western Ohio through a granular local presence with national and global reach through the best-in-class service partners.

Peace of mind.

24/7/365 NOC monitoring service for mission critical operations.

Ohio Strong.

Owned, operated and supported by Ohio companies to support economic growth in Ohio.

- Internet Access Service
- Managed Fiber Tail Services
- MPLS Network Service
- Disaster Recovery Site
- Collocation Services

Bringing high performance, high capacity Ethernet-over-Fiber transport solutions to your doorstep.

About Independents Fiber Network.

Independents Fiber Network, a wholly-owned subsidiary of Com Net, Incorporated (CNI), was established in 2003 to create a high performance, high capacity fiber network with national and international reach to provide voice, video and data services. Independents Fiber Network offers the ease of a single point of contact for ordering, provisioning and monitoring of transport services over the GigE+ Network.

Locally, Independents Fiber Network makes HD video content available to communication providers in western Ohio and southern Michigan through connectivity to CNI's digital video headend (IPTV).
